Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 March 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Claims 1-28 are presented for examination.

Applicants' information disclosure statement filed May 6, 2004 has been received and entered.

Applicants' election filed March 12, 2007 in response to the restriction requirement of February 13, 2007 has been received and entered. The applicants elected the invention described in claims 1-23 (Group I) without traverse.

Claims 24-28 are withdrawn from consideration as being drawn to the non-elected invention (37 CFR 1.142(b)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Phillips (6,645,988 B2).

Phillips teaches pharmaceutical preparations comprising proton pump inhibitors such as substituted benzimidazoles, wherein the solid pharmaceutical dosage form is not enteric coated (see the abstract). Note particular to column 8, lines 15-30 states the proton pump inhibitor (PPI) is combined with a buffering agent can be formulated into a tablet, suspension tablet, chewable tablet, capsule, two-part tablet or capsule

(multi-layered), pellets and granules. Also the formulations can include flavoring agents (a taste masking agent). Column 11, lines 35-54 states the buffering agents (same as antacids) are not limited to sodium, magnesium, aluminum or calcium salts of hydroxides, carbonates, sulfates, bicarbonates or silicates (also see column 14, lines 47-54). Column 16, lines 16-37 shows the processes of the dry granulation and wet granulation. Note particular to column 47, lines 34-68 and column 48, lines 1-21 shows amino acids (same as alkaline agent) can be also employed as buffering agents (buffers). Note the amino acids include lysine and arginine. Finally, Phillips teaches in column 75, claim 1, that the PPI are omeprazole, lansoprazole, pantoprazole, pariprazole, leminoprazole, salts, enantiomers, isomers or derivatives.

Clearly, the cited reference teaches every limitation of the instant invention including the binders used to formulate the tablets (column 13, lines 34-68); therefore, the applicants' instant invention is unpatentable.

Claims 1-23 are not allowed.

The remaining references listed on the enclosed PTO-892 are cited to show the state of the art.
